TITLE	Mean ACT Composite Score by Oklahoma High School Site. Oklahoma High School Indicators Project.
INSTITUTION	Oklahoma State Regents for Higher Education, Oklahoma City.
PUB DATE	1997-10-00
NOTE	48p.; For related report on headcount, semester hours, and grade point average, see TM 028 326.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Evaluative (142)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	Academic Achievement; *College Entrance Examinations; *High School Graduates; High Schools; *Scores; Tables (Data); *Test Results
IDENTIFIERS	ACT Assessment; *Educational Indicators; *Oklahoma; Oklahoma State Regents

ABSTRACT

The Oklahoma State Board of Education and the State Regents for Higher Education produce an annual report of information from the Oklahoma Educational Indicators Program. This document, part of that effort, is a report on the mean American College Testing program (ACT) scores of Oklahoma high school seniors. The report includes ACT test takers who took the ACT as juniors or seniors graduating in 1997. County, district, and high school are listed and are followed by the high school ACT code, a computed mean ACT composite score or high school graduates, and the number of graduates who took the examination. Mean ACT scores range from 15.1 at a high school in Tulsa to 31.0 for the School of Science and Mathematics. The largest number of ACT takers was at a school in Tulsa County, with 530 graduates taking the examination. National figures from the ACT are provided for comparison purposes. (SLD)

OKLAHOMA EDUCATIONAL INDICATORS PROGRAM
MEAN ACT COMPOSITE SCORE BY HIGH SCHOOL SITE

With the passage of the "Oklahoma 2000 Education Challenge Act" in May of 1989, the State of Oklahoma affirmed a commitment to promoting excellence in the education of Oklahoma children. The act established requirements and programs designed to ensure that by the year 2000: all children will be ready to do first-grade schoolwork when they are enrolled in first grade; at least 90 percent of students entering first grade will ultimately graduate from high school; at least 50 percent of the graduates of each of Oklahoma's high schools will have demonstrated mastery as seniors at or above national average levels of accomplishment; and at least 80 percent of the graduates of each of Oklahoma's high schools will be fully prepared to begin college work.

The act also established that the State Board of Education publishes annually a summary report of information provided by the Oklahoma Educational Indicators Program. The purpose of this program is to develop and implement a system of measures or "indicators" of educational performance. It also mandated that the State Regents cooperate in the annual publication of this report. The State Regents with the cooperation of other agencies and the State Department of Education has participated in the development of indicators of comparative educational standing and accomplishment. It has been informally termed the High School Indicators Project.

The State Regents High School Indicators Project provides a report on the mean ACT scores of Oklahoma high school graduates. The ACT tests are measures of educational development. Performance on the tests is influenced by the student's educational experiences, as the patterns of difference in average scores according to type of high school program clearly indicate. The ACT Corporation cautions against using the ACT test scores in isolation from other measures to infer the overall quality of school and education within a state. Specifically, the ACT tests are designed to measure high school students' educational development as related to their readiness to pursue further study at the college level.

In this report, included as ACT test-takers are those students taking the ACT as juniors/seniors who were graduating in 1997. The ACT results for 1997 offer Oklahoma the opportunity for a seventh year to consider only test-takers who took the enhanced ACT exam. With the assistance of the State Department of Education, the county, district, and high school site were listed followed by: (1) the high school ACT code assigned by the ACT Corporation, (2) a computed mean ACT composite score of high school graduates, and (3) the number of graduates who took the ACT exam. For high schools with five or fewer ACT test-takers, an asterisk was entered in the mean ACT column in order to comply with the federal privacy act. A few high schools have blank entries, which indicate that there was no ACT test-takers reported that year. The mean ACT scores range from 15.1 for McClain High School in Tulsa county with 38 test-takers to and 31.0 for the School of Science and Math with 78 test-takers in Oklahoma county. The high school with the largest number of high school graduates who took the ACT exam was Broken Arrow High School in Tulsa county with 530 test-takers, followed by Norman High School in Cleveland county with 495 test-takers.

In addition, Table 4, "Mean ACT Scores, Frequency Distributions, and Cumulative Percentages for Male and Female Combined (Total)" for Oklahoma and the Nation have been provided from the ACT High School Profile Report, H S Graduating Class 1997. According to these tables, 959,301 high school graduates across the United States took the exam. Oklahoma high school graduates represent 24,134 of these high school graduates. Most of these high school graduates, 22,153 or 91.8% of all high school graduate test-takers, provided enough information to be matched with a high school ACT code and State Department of Education county/district/site code.
